

Advance Notice of Joint Congress of ICNA and AOCNA Brisbane, Australia May 27 - June 1 2012

Dear Colleagues and Friends On behalf of the Organising Committee and the Australian and New Zealand Child Neurology Society, it is my pleasure to invite you to the 12th ICNC and 11th AOCN joint congress of child neurology. This is the third occasion that a joint congress has been held and we are pleased to be hosting the congress in Brisbane, Australia.

ICNA and AOCNA are closely linked. Their aims are to improve the quality of care for children with neurological diseases, promote high quality training for child neurologists and provide support for developing countries. This is an exciting time for child neurologists with rapid expansion and significant developments in paediatric neurosciences. The joint congress will provide a great opportunity for collaboration to promote child neurology to all areas of the world and to provide information on the latest advances in child neurosciences.

We invite you to enjoy the scientific and social content of the congress.

Dr Geoff Wallace, President of Organising Committee
